## **1 Basis of preparation (cont'd.)**

Adoption of the above standards and interpretations will not have any material impact on the financial statements in the year of initial application, except as discussed below:

### **MFRS 9 Financial Instruments ("MFRS 9")**

In July 2014, the IASB issued the final version of IFRS 9 Financial Instruments which reflects all phases of the financial instruments project and replaces IAS 39 *Financial Instruments: Recognition and Measurement* and all previous versions of IFRS 9. The standard introduces new requirements for classification and measurement, impairment, and hedge accounting. IFRS 9 is effective for annual periods beginning on or after 1 January 2018, with early application permitted. Retrospective application is required, but restatement of comparative information is not compulsory. Early application of previous versions of IFRS 9 (2009, 2010 and 2013) is permitted if the date of initial application is before 1 February 2015.

MFRS 9 is issued by the MASB in respect of its application in Malaysia. It is equivalent to IFRS 9 as issued by IASB, including the effective and issuance dates. The areas with expected significant impact from application of MFRS 9 are summarised below:

#### **(i) Classification and measurement**

The classification and measurement of financial assets is determined on the basis of the contractual cash flow characteristics and the objective of the business model associated with holding the asset. Key changes include:

- The held-to-maturity ("HTM") and available-for-sale ("AFS") asset categories will be removed;
- A new asset category measured at fair value through other comprehensive income ("FVOCI") is introduced. This applies to debt instruments with contractual cash flow characteristics that are solely payments of principle and interest and held in a model whose objective is achieved by both collecting contractual cash flows and selling financial assets;
- A new asset category for non-traded equity investments measured at FVOCI is introduced; and
- Classification of financial liabilities will remain largely unchanged, other than the fair value gains and losses attributable to changes in 'own credit risk' for financial liabilities designated and measured at fair value through profit or loss to be presented in other comprehensive income.

The adoption of MFRS 9 will have an effect on the classification and measurement of the Group's financial assets, and may have no impact on the classification and measurement of the Group's financial liabilities.

## **1 Basis of preparation (cont'd.)**

### **MFRS 9 (cont'd.)**

#### (ii) Impairment

The MFRS 9 impairment requirements are based on an expected credit loss model (“ECL”) that replaces the incurred loss model under the current accounting standard. The Group will be generally required to recognise either a 12-month or lifetime ECL, depending on whether there has been a significant increase in credit risk since initial recognition. The ECL model will apply to financial assets measured at amortised cost or at FVOCI, irrevocable loan commitments and financial guarantee contracts, which will include loans, advances and financing and debt instruments held by the Group. MFRS 9 will change the Group’s current methodology for calculating allowances for impairment, in particular for individual and collective assessment and provisioning.

#### (iii) Hedge accounting

The requirements for general hedge accounting have been simplified for hedge effectiveness testing and may result in more designations of hedged items for accounting purposes.

The Group is in the process of assessing the financial implications for adopting the new standard.

### **MFRS 15 Revenue from Contracts with Customers ("MFRS 15")**

MFRS 15 replaces all existing revenue requirements (MFRS 111 *Construction Contracts*, MFRS 118 *Revenue*, IC 13 *Customer Loyalty Programme s*, IC 15 *Agreements for the Construction of Real Estate*, IC 18 *Transfers of Assets from Customer s* and IC 131 *Revenue – Barter Transactions Involving Advertising Services*) in MFRS and applies to all revenue arising from contracts with customers. It also provides a model for the recognition and measurement of sales of some non-financial assets including disposals of property, equipment and intangible assets.

The standard outlines the principles an entity must apply to measure and recognise revenue. The core principle is that an entity will recognise revenue at an amount that reflects the consideration to which the entity expects to be entitled in exchange for transferring goods or services to a customer.

The Group is in the process of assessing the financial implications for adopting the new standard.

## **2 Audit report of preceding annual financial statements**

The auditors’ report on the Financial Statements for the year ended 31 January 2015 of the Group was not subjected to any qualification.

## **3 Seasonality and cyclicity factors**

The operations of the Group were not materially affected either by seasonal or cyclical factors.

#### **4 Exceptional items/unusual events**

There was no unusual item affecting assets, liabilities, equity, net income, or cash flows during the fourth quarter ended 31 January 2016.

#### **5 Variation from financial estimates reported in preceding financial period**

There were no changes in estimates of amounts reported in the preceding financial period that would have a material effect in the current quarter results.

#### **6 Debt and equity securities**

There were no issuance, cancellation, resale and repayment of either debt or equity securities during the year under review except for the following:

The amount of RM1,471,900 which the issued share capital was diminished was transferred to the capital redemption reserve in accordance with the requirements of Section 67A of the Companies Act, 1965. The issued share capital after cancellation of treasury shares diminished from 288,064,391 ordinary shares of RM1.00 each to 286,592,491 ordinary shares of RM1.00 each. The carrying amount of the treasury shares cancelled was set off against retained profits.

As at 31 January 2016, the Company does not hold any treasury shares.

## **6 Debt and equity securities (cont'd.)**

### **(iii) Capital reduction**

During the financial year, the Company has undertaken a distribution exercise to shareholders comprising a capital repayment of RM0.88 per ordinary share of RM1.00 par value each and special dividend of RM0.117 per ordinary share (“Distribution Exercise”).

The capital repayment was via a capital reduction by cancellation of RM0.88 from the par value of each existing ordinary share of RM1.00 each pursuant to Section 64 of the Companies Act, 1965. The capital reduction was effected on 19 November 2015 and the total issued and paid-up share capital of the Company was reduced by RM252,201,392 from RM286,592,491 to RM34,391,099 based on the total issued and paid-up share capital of 286,592,491 ordinary shares after taking into account the cancellation of 1,471,900 treasury shares and the issuance of 19,842,300 ordinary shares of RM1.00 par value each pursuant to the exercise of options under the ESOS. After the capital reduction, the paid-up share capital of RM34,391,099 comprised 286,592,491 ordinary shares of par value RM0.12 each.
